## PROFILE

Java & Web Developer with hands-on experience designing, building, and scaling robust web applications. Comfortable across the entire software development lifecycle – from architecting secure RESTful APIs using Spring Boot and managing relational databases to crafting responsive, high-performance frontends. Fast learner with a builder's mindset, dedicated to writing clean, maintainable code and delivering seamless user experiences.

## SKILLS

### Programming

Java, JavaScript

### FrontEnd

Html, CSS, Tailwind, JavaScript

### Backend

SpringBoot, Spring Security

### Database

MySQL

### Testing

Unit Testing

## PROJECTS

### E-Commerce Application

**E-Commerce Application** | Java, Spring Boot, React, MySQL, Razorpay, JWT

- Built a full-stack e-commerce platform (Spring Boot + React) with JWT-secured, role-based product browsing, cart, and checkout flows integrated with Razorpay payments.
- Designed an admin panel for product/order management, documented REST APIs with Swagger, and deployed via Docker on Render (backend) and Vercel (frontend).

### Event Management System

**Full-Stack Event Management Platform** | Java, Spring Boot, React, MySQL, JWT

- Built a full-stack event management platform (Spring Boot + React) with JWT-based auth, role-based access control, and event search/registration features.
- Developed an admin dashboard, automated email reminders, and 14+ tests (JUnit/Mockito); containerized with Docker and deployed on Render/Vercel.

### JobConnect

**Job Portal Application** | Java, Spring Boot, React, PostgreSQL, JWT, Twilio

- Built a full-stack job portal with a Spring Boot REST API and React (Vite) frontend, using JWT authentication and Spring Security for secure access control.
- Integrated Twilio SDK for real-time SMS notifications and used Spring Data JPA with PostgreSQL for data persistence; containerized the backend with Docker and deployed the frontend on Vercel.

## CERTIFICATES
