Kshitij Raj

Java Full Stack Developer

Kshitijraj22@gmail.com +91 75199 14746 Noida, Uttar Pradesh

PROFILE

Java Full Stack Developer who has designed and deployed three production-grade Spring Boot applications — **51 REST endpoints** and **159 automated tests** in total. Comfortable securing APIs with Spring Security and JWT, modelling relational and document databases, integrating third-party payment and messaging providers, and shipping React frontends to live cloud deployments.

TECHNICAL SKILLS

Languages	Java 17, JavaScript (ES6+), SQL
Core Java	OOP & SOLID, Collections Framework, Generics, Streams & Lambdas, Optional, Exception Handling, Multithreading & Concurrency, Java 8+ features
Backend	Spring Boot 3.x, Spring Security, Spring Data JPA / Hibernate, Spring Data MongoDB, REST API design, JWT authentication, Bean Validation, Scheduled jobs
Frontend	React, Vite, HTML5, CSS3, Tailwind CSS, Axios
Databases	MySQL, PostgreSQL, MongoDB (Atlas)
Testing	JUnit 5, Mockito, Spring Boot Test, MockMvc, H2
Tools	Git & GitHub, Maven, Docker, Postman, Swagger / OpenAPI, Render, Vercel

PROJECTS

E-Commerce Platform

Live · Code

Java 17 · Spring Boot 3.2.5 · Spring Security · React · MySQL · Razorpay · Swagger · Docker

- Built a full-stack storefront exposing **20 REST endpoints** across 5 controllers over **5 JPA entities**, with JWT-secured browsing, cart and checkout.
- Integrated **Razorpay** payments with server-side HMAC signature verification, so an order can never be marked paid by the client.
- Wrote **86 tests across 13 classes** — Mockito service tests, `@WebMvcTest` controller slices, `@DataJpaTest` repository tests and a full end-to-end purchase workflow.
- Documented all 20 endpoints with **Swagger / OpenAPI**; containerised with a multi-stage Dockerfile and deployed to Render + Vercel.

EventHub — Event Management Platform

Live · Code

Java 17 · Spring Boot 3.2.5 · React · PostgreSQL · JWT · JUnit 5 · Mockito · Docker

- Designed **18 REST endpoints** over 5 entities with role-based access control, filtered event search, an admin dashboard and attendance tracking.
- Prevented double-booking with a composite **database-level unique constraint** on `(user_id, event_id)` — closing the race window an application-level check would leave open.
- Wrote **72 tests across 12 classes** running against in-memory H2, so the suite needs no external database.

CareerNest — Job Portal

Live · Code

Java 17 · Spring Boot 3.3.2 · React (Vite) · MongoDB Atlas · Twilio · JWT · Docker

- Built a two-sided job portal with **13 REST endpoints** across 4 controllers, persisted in **MongoDB Atlas** via Spring Data MongoDB across 3 collections.
- Enforced **JOB_SEEKER / EMPLOYER** separation with method-level security plus ownership checks, so an employer cannot modify another's postings.
- Integrated the **Twilio SDK** to send real-time SMS when an application's status changes.
